

Procedure to Modify the Sleep Screen

Step 1: Access the Menu

- Press the **Menu** button on your remote to open the setup box menu.

Step 2: Go to Profile

- Use the arrow keys on the remote to navigate down and select the **Profile** option. Press **OK**.

Step 3: Access Preferences

- Once in the profile, select **Preferences** and press **OK**

Step 4: Enter the PIN

- Enter the default decoder PIN: **9999**.

Step 5: Modify Sleep Settings

- In the **Preferences** menu, find the **Standby Inactivity Delay** option and press **OK**.
- Use the left or right arrow keys on the remote to select the sleep delay or disable it completely. (1h, 2h, 3h, 4h, 5h, 6h, or Never)

Important Note: Do not use the "Never" option.

This may cause premature disk wear, data loss, and possibly physical damage.

Once your selection is made, press **OK** to confirm, then select **Submit** at the bottom of the menu and press **OK**.

Step 6: Exit the Menu

- Press **Exit** to close the menu and return to your program.
